Plainfield Animal Hospital :: Blood Feathers Because the feather has an artery and a vein, a damaged blood feather will bleed, often profusely. Some birds are prone to breaking blood feathers, particularly cockatiels and ring necks. Birds that are nervous, overcrowded in their cage or thrashing around are also apt to break blood feathers.

What to Do if Your Bird Breaks a Blood Feather A broken blood feather that remains in a bird's skin essentially acts as an open faucet, allowing blood to pour out of the bird's body. Because birds cannot tolerate much blood loss, broken blood feathers that are left untreated can be fatal in some cases.
