Human Anatomy: Blood - Cells, Plasma, Circulation, and More Blood is mostly liquid, with numerous cells and proteins suspended in it, making blood "thicker" than pure water. The average person has about 5 liters (more than a gallon) of blood. K.Flav - Blood In The Cut Mix - K.Flav - Blood In The Cut YouTube twenty one pilots: Heathens (from Suicide Squad: The Album) [OFFICIAL VIDEO] - Duration: 3:38. Fueled By Ramen 1,082,954,672 views. Blood - Wikipedia Blood is a body fluid in humans and other animals that delivers necessary substances such as nutrients and oxygen to the cells and transports metabolic waste products away from those same cells. In vertebrates, it is composed of blood cells suspended in blood plasma.

Blood in the Stool Symptoms, Diagnosis, Treatments and ... Blood in the stool is an abnormal, potentially critical condition, in which there is blood mixed in with the bowel movement or feces. Blood in the stool is also called bloody stool or melana and is often a sign of gastrointestinal bleeding. Having blood in the stool can appear in a variety of forms. What Causes Blood in Urine (Hematuria) in Males & Females? Evaluating blood in urine requires consideration of the entire urinary tract. Tests used for the diagnosis of blood in urine may include a CT scan, cystoscopy, ultrasound, IVP, MRI, urine culture, and urine cytology. Management of blood in the urine depends upon the underlying cause. Blood | MedlinePlus Your blood is made up of liquid and solids. The liquid part, called plasma, is made of water, salts, and protein. Over half of your blood is plasma. The solid part of your blood contains red blood cells, white blood cells, and platelets. Red blood cells (RBC) deliver oxygen from your lungs to your tissues and organs.
